

Design file management. Organizes data creation and documentation. Vault Basic is included with subscription to the Product Design & Manufacturing Collection and not sold separately.

Data management for teams. Automates design tasks, manages revisions, and helps enforce standards.

Advanced enterprise product data management. Connects distributed teams with multisite collaboration. Delivers valuable insights.

For Non CAD users to be part of the work flow

Features	Vault Basic	Vault Workgroup	Vault Professional
Inventor CAD integration	X	X	X
Civil 3D integration	X	X	X
Support for AnyCAD	X	X	X
Fast data searching	X	X	X
Central location for project data	X	X	X
Data reuse	X	X	X
Concurrent design	X	X	X
Easy administration and configuration	X	X	X
Quick, flexible deployment	X	X	X
Microsoft Office integration (Word, Excel, PowerPoint)	X	X	X
Visual data management for Inventor		X	X
Automate tasks and deliverable creation		X	X
Automatically publish and manage PDFs		X	X
Projects and reporting		X	X
Revision control		X	X
Flexible data security		X	X
Microsoft Outlook integration		X	X
Project lifecycles		X	X
Vault Office		X	X
Geometric search			X
BOM management			X
Automated engineering change orders			X
Custom objects			X
Multisite scalability			X
PLM integration			X
ERP integration			X
Revit integration			X
Fusion Team integration			X
BIM 360 integration			X

Features	Vault Office
Create folders	X
Move, Rename, and Delete non-CAD files	X
Move, Rename, and Delete folders which do not contain CAD files	X
Check in, check out, perform quick checkouts, and undo checkouts on non-CAD files	X
Check in, check out, perform quick checkouts, and undo checkouts on folders	X
Note: CAD files in the folder are not affected.	X
Open CAD files as read-only	X
Edit non-CAD file properties	X
Edit folder properties	X
Attach non-CAD files to CAD files	X
Attach files to non-CAD files	X
Detach files from non-CAD files	X
Classify, categorize, change lifecycle definition, change state, and change revision on non-CAD files	X
Classify, categorize, change lifecycle definition, and change state on folders	X
Change state on CAD files	X
Custom Object Tasks	X
Create Custom Object instances	X
Classify, categorize, change lifecycle definition, change state, and change revision on custom objects	X
Edit custom object properties	X
Job Processor Tasks	X
Update view using Queue Update	X
Send jobs to the Job Processor	X
Shortcuts and Links Tasks	X
Create, edit, and delete links to folders and non-CAD files	X
Create, modify, and delete links of non-CAD files and folders to custom objects	X
Item Tasks	X
Read item details (Bill of Materials, etc.)	X
Change state on items	X
Report Tasks	X
Run reports on files, folders, items, and change orders	X
Rerun reports on Bills of Materials (BOMs)	X
Run reports on Custom Objects	X
Change Order Tasks	X
Created, edit, and participate in Change Orders	X
General Tasks	X
Go to working folder	X
Access and create saved searches	X
Enable custom utility for non-CAD files, folders, and custom objects	X
